Professional Summary

Results-oriented Software Engineer with 3+ years of experience building cross-platform, production-grade applications serving over 1000+ users. Expertise in **Go, TypeScript, and system programming** with a passion for **Linux systems and open-source technologies**. Proven track record of shipping production tools, including **NPM packages and CLI utilities**, and leading cross-functional projects.

Experience

- ### CDW Technologies India Private Limited — Chennai, IN

  Software Engineering Intern -> Fulltime Software Engineer — *Mar. 2026 -- Present*

  - Built and maintained backend services using **NestJS**, implementing RESTful APIs and business logic for internal applications
  - Set up and managed development infrastructure, including **Docker** environments, **Git** repository migration, and database backup/restore workflows through data synchronization endpoints
  - Developed data processing pipelines using **Apache Kafka** for asynchronous messaging, parallel processing, and data transformation
  - Collaborated with cross-functional engineers in an **Agile** environment, participating in **Scrum** ceremonies, code reviews, and feature delivery

- ### Green Collar Agritech Solutions — Bengaluru, IN

  Freelancer → Student Intern → Software Engineering Intern — *Nov. 2023 -- Feb. 2026*

  - Developed responsive web applications using **React.js**, **Next.js**, and modern frontend best practices, supporting 500+ daily active users
  - Improved application performance by 40% using **TanStack Query** caching and optimized rendering strategies
  - Enhanced **SEO** and page performance through **server-side rendering (SSR)**, contributing to a 25% increase in organic traffic
  - Collaborated with cross-functional engineers in an **Agile** environment, participating in **code reviews**, Scrum ceremonies, and feature delivery

Projects

- ### Cred - Secure CLI Password Manager — GitHub | Docs

  Go | Cobra CLI

  - Developed production-ready CLI tool for **secure password, environment variables,** and SSH key management
  - Applied **GPG encryption** with **Git-based storage enabling version control** and audit trails
  - Attained zero-knowledge architecture with client-side encryption
  - Reduced credentials management overhead by 60% through streamlined CLI workflows for users
  - Created comprehensive documentation with 20+ command examples and security best practices guide

- **Abstract-UI - React Component Library** GitHub | Demo | NPM
  React | TypeScript | Tailwind CSS | Storybook
  - Built and released a reusable accessibility-first component library to **NPM** with 100+ weekly downloads
  - Documented 12+ components with 30+ configurable variants in **Storybook**
  - Reduced development time by 30% for **React/Next.js** applications through a standardized design system
  - Integrated **TypeScript** for type safety and improved developer experience
  - Realized 95%+ developer satisfaction through intuitive API design and comprehensive TypeScript definitions
- **L2Shift - Cross-Platform MAC Address Manager** GitHub
  C | System programming
  - Engineered cross-platform CLI tool for **MAC address** modification using native system APIs
  - Executed Linux support via **direct syscalls** and macOS compatibility through **ifconfig** integration
  - Attained 100% success rate across multiple Linux distributions and macOS versions
  - Demonstrated **advanced networking** knowledge and **low-level system programming** expertise
  - Designed an intuitive command-line interface with help system and validation, reducing user errors by 80%
- **NeoUrl - High-Performance URL Shortener** GitHub | Live
  Go | HTMX
  - Enhanced **cloud-native** URL shortening service with **Go backend** and modern **HTMX frontend**
  - Implemented efficient URL mapping algorithm with **collision detection** and custom short codes
  - Deployed on **cloud infrastructure** serving 500+ daily URL conversions with 99.9% uptime
  - Optimized performance, achieving **sub-100ms response times** with minimal resource usage
  - Applied smart caching layers for database optimization that reuses shortened endpoints for duplicate URLs, improving response efficiency by 45%

Technical Skills

- **Languages** : Go, TypeScript, JavaScript, Python, C, Java, SQL
- **Frontend** : React.js, Next.js, HTML, CSS, Tailwind CSS, Shadcn-UI, TanStack Tools
- **Backend & API** : Node.js, Express.js, Nest.js, FastAPI, RESTful APIs, WebSockets
- **Databases** : PostgreSQL, MongoDB
- **Messaging & Streaming** : Apache Kafka
- **DevOps & Tools** : Linux, Docker/Podman, Git, AWS (EC2, S3), Shell Scripting, CI/CD
- **Development Tools** : Neovim, Bruno/Postman, Storybook, Vite, ESLint, Prettier, Cobra CLI, tmux

Education

- **Kongu Engineering College** Tamilnadu, IN
  B.Tech in Artificial Intelligence & Machine Learning; CGPA: 8.84/10.0 *Nov. 2022 -- May. 2026*

Achievements

- Certified MongoDB Associate Developer (Certificate)
- Solved 500+ **data structures and algorithms problems** on **LeetCode** across **Go, Python, and Java**, maintaining a 365+ day streak.
